

INFORMATION FOR REFERRAL

TEER with V-Clamp

Which patients are eligible?

The V-Clamp method is particularly suitable for dogs with:

- Degenerative mitral valve disease in later stage B2, C or D
- Progressive clinical symptoms despite optimized medication
- Body weight between 2.5 – 15 kg
- Age < 12 years / no cardiac or systemic comorbidities

HOW TO REFER YOUR PATIENT

Get in touch

By phone or e-mail

Sharing findings

Current cardiac work-up (echocardiography as DICOM) and thoracic X-ray – please send via WeTransfer.com

WHY V-CLAMP?

- ✓ minimally invasive technique
- ✓ Reduced anesthesia and surgery time
- ✓ No bypass machine needed
- ✓ Better quality of life / prognosis

INFORMATION FOR REFERRAL

TEER with V-Clamp

PRE-OPERATIVE WORK-UP

to rule out systemic diseases

- Blood work (geriatric profile incl. CRP, blood type and coagulation times (PT/aPTT))
- Abdominal ultrasound
- Thoracic X-ray (in 2 planes)

RISKS

- Significantly lower than with classical open-heart surgery

96 %

Survival rate (Potter et al., 2024)

PRICE

13,000 – 13,500 €

Total price incl. VAT

incl. transoesophageal echocardiography, anaesthesia / TEER procedure, inpatient care and take-home medication

WHAT AWAITS THE PET OWNER?

- Detailed briefing on the procedure, risks and aftercare
- Further cardiac evaluation & pre-operative preparation
- Follow-up care in close coordination with you as the referring vet

POST-OPERATIVE CARE

48 hours inpatient stay

HOME AFTERCARE

4 weeks of reduced activity
